

Property-tax review: one-page briefing

FICTIONAL TRAINING DATA - NOT TAX ADVICE. Invented USD amounts, tax year 2026. No causes, tax rules, rates, or deadlines are included.

Book and bill amounts for Ohio and Texas were combined from four input files and reconciled by State, Tax year, and Property ID. All figures below come from outputs/meeting-reconciliation.xlsx, which was recalculated in Excel with all 12 checks reading OK.

Totals

Measure	Ohio	Texas	Total
Book total	\$90,000	\$100,000	\$190,000
Bill total	\$92,000	\$101,200	\$193,200
Bill minus Book	+\$2,000	+\$1,200	+\$3,200
Properties / exact matches	7 / 3	6 / 5	13 / 8 (61.5%)
Exceptions	4	1	5
Matched net difference	\$0	+\$1,200	+\$1,200
Matched gross difference	\$1,000	\$1,200	\$2,200

Exceptions (5 of 13 properties)

State	Property ID	Book USD	Bill USD	Bill minus Book	Status	Source rows
OH	010002	\$18,000	\$18,500	+\$500	Amount difference	OH-book row 6; OH-bills row 6
OH	010003	\$9,000	\$8,500	-\$500	Amount difference	OH-book row 7; OH-bills row 7
OH	010006	\$14,000	Missing (no bill)	n/a	Book only	OH-book row 10; no bill row
OH	010007	Missing (no book row)	\$16,000	n/a	Bill only	no book row; OH-bills row 10
TX	020003	\$24,000	\$25,200	+\$1,200	Amount difference	TX-book row 7; TX-bills row 7

A missing counterpart is shown as Missing, not as zero. Property IDs are text and keep their leading zero.

Reconciliation bridge

Matched net +\$1,200 + bill-only \$16,000 - book-only \$14,000 = +\$3,200, which equals Bill total minus Book total (\$193,200 - \$190,000). The bridge ties in Excel (Checks row 16 = 0). Ohio nets to zero on matched items but carries a \$1,000 gross difference, so net alone would hide two items.

Questions to resolve

1. Ohio 010002 (+\$500) and 010003 (-\$500): what explains each difference? They offset to zero in total, and each one still needs its own explanation.
2. Ohio 010006: the book shows \$14,000 and no bill was received. Is a bill expected?
3. Ohio 010007: a \$16,000 bill arrived with no book row. Should a book record be created?
4. Texas 020003: the bill is \$1,200 above the book. Which figure is right?
5. Who owns each open item, and what is the review date?

What to check in Excel

Open outputs/meeting-reconciliation.xlsx. On the Checks sheet every row in column D should read OK. On State totals, D9 and D23 should both be \$3,200, and D19 (\$1,200) should differ from D20 (\$2,200).
